-CONTINUED-

STEP 4 Thoroughly clean surface of the frame with supplied alcohol pads where the covers will be installed.

STEP 5 Remove the backing from the adhesive pad installed on the upper end of the cover. Slip the cover into place, being careful to hold the upper end of the cover away from the frame as you maneuver it into position. Line up the holes in the frame cover with the holes in the frame and fasten with the screws provided. Place a dab of the enclosed anti-seize on each screw prior to installation. Thread them in fully, but do not tighten them at this time.

STEP 6 Once the screws are installed in the mounting holes, press the upper section of the cover into place and apply pressure for approximately 15 seconds to ensure proper adhesion.

STEP 7 Carefully tighten the mounting fasteners. Do not over tighten. (See PIC.4.)
